Interpretation	- TAS would be interested in developing interpretation of the village and area to tell the story of Tsurai through signage, brochures, and possibly guided tours.	- Would defer to the Yurok Tribe and TAS	-Would enjoy learning more about the history of Tsurai. See it as an important educational component and should be included in the TMP.			- Agree with TAS
<ul style="list-style-type: none"> Signage 	<ul style="list-style-type: none"> - Would like to see different wording on commemorative plaque: “Old Home Beach” to replace “Indian Beach” - Interested in interpretive signage for educational purposes, ex: Sumeg Village 	- Would defer to the Tribe and TAS but believe interpretive signs would be good tools to inform the public and protect the site while promoting and directing beach access.	-Signs would be a good idea, but need specifics on where and what for.	<ul style="list-style-type: none"> - Could have natural resources and vegetation as a part of the interpretive signage. - In the past, signs have been installed on Parker Creek trail but property owners did not like them and took them down. - Suggest that 	- Signs for trails should be used to direct people. Agrees that Parker Creek Trail needs to be marked from both directions.	

Management Issue	Tsurai Ancestral Society	City of Trinidad	Adjacent Property Owners	Interested Public	State Coastal Conservancy	Yurok Tribe
				signs not be used to identify site location. If you don't want people to know where it is, don't tell them.		
<ul style="list-style-type: none"> Print/Web 	- Interested in developing informative brochures to tell history of Tsurai and its significance to Yurok people and TAS.	- Police dept. and Chamber of Commerce have websites and access to website development. Info on village and history could be a good project for Museum Society and TAS to do jointly and put on Chamber of Commerce website as a link			- Add interpretation/ history of site on City of Trinidad and/or Humboldt County's websites	
<ul style="list-style-type: none"> Site Restoration 	-Site protection, specifically of the cemetery and eroding cultural deposits	Would defer to Tribe and TAS on what to do re: the long term vision and		- Support the idea of restoring the site for cultural uses and for	- Re: environmental restoration CC would like to see removal of	- Support site restoration and reintroduction of Brush Dance in the future.

Management Issue	Tsurai Ancestral Society	City of Trinidad	Adjacent Property Owners	Interested Public	State Coastal Conservancy	Yurok Tribe
	<p>is the primary concern.</p> <p>-Village restoration would be considered, possibly a plank house.</p> <p>- TAS would like to see the Brush Dance restored.</p> <p>- One of the reasons TAS is so concerned about water quality is that one of the streams is used for Tsurai ceremonies and right now it can't be used because it is contaminated.</p>	<p>future management of the site, including restoration.</p>		<p>educational purposes.</p>	<p>invasive plants and replacement with native and/or historical and/or culturally significant plants.</p> <p>- Suggests that restorations plans include cultural use-only efforts where the TAS and Yurok people could use the area for cultural purposes, not. nec. for the Public</p>	
<ul style="list-style-type: none"> Visitation 	<p>-The cemetery is not a public use area, it</p>	<p>-City would appreciate a protocol for site</p>				

Management Issue	Tsurai Ancestral Society	City of Trinidad	Adjacent Property Owners	Interested Public	State Coastal Conservancy	Yurok Tribe
	should be treated as a cemetery	visitation, especially for monitoring and water quality sampling purposes. -City would like to know who to contact for site access.				
Cultural Site Management	- TAS and Yurok Tribe have sole authority in determining what is appropriate management of cultural resources within the site.	Would defer to Yurok Tribe and TAS on how to manage cultural resource issues on the site and study area.	-Recognize that Yurok and Tsurai descendents know best how to manage the cultural resources in the site.			- Agrees with TAS.
<ul style="list-style-type: none"> Vegetation 	-Vegetation management should only be dictated on what is best to protect the CRs and stabilize the site.			- Many would like to enhance or create views from the bluff by thinning, topping, or removing trees.		

Management Issue	Tsurai Ancestral Society	City of Trinidad	Adjacent Property Owners	Interested Public	State Coastal Conservancy	Yurok Tribe
	-Dense vegetation over the site is a problem. It makes access and monitoring difficult and provides cover for looters.					
<ul style="list-style-type: none"> Village Site Restoration 	- Would like to see the village restored in the future and someday have a Brush Dance there	- Don't have full consensus on if full village restoration would be possible, but don't object to the plausibility.	- Considered to be a good idea- has an educational aspect as well as a tourist attraction. - One outcome of village restoration would be increased visitors and increased impacts, should be considered in any restoration plans.	- Many support the idea and are excited to learn more about Tsurai and Yurok history and living culture. - Member of Trinidad Museum Society would like to see site restored for educational purposes to be used as a lab.	- Would support village restoration as long as it doesn't exclude public access. - This doesn't mean that public should have access to the cultural site, but they would like to see the main objective be the natural and coastal restoration before cultural restoration - Would TAS create provisions for what could

					occur within restored village?	
Issues, Concerns, and Visions for the Future	<ul style="list-style-type: none"> - Would like to see the land transferred to the Yurok Tribe to be co-managed with TAS. - Believe the City has not honored its stewardship obligations or followed the consultation protocol in Policy 69. - Runoff, and septic contamination is a primary concern for site stability and public safety reasons. It must be resolved. - Seepage from 	<ul style="list-style-type: none"> - Wastewater treatment grant will monitor water quality within the 12.5-acres and soil, however, grant in initial stages. - Monitoring will provide data to then create MP on when to pump or replace certain septic systems - Concerned with historical context section. Wants “non-biased” historical interpretations supported by research to be used in final Management 	<ul style="list-style-type: none"> - Recognize that Tsurai/Yurok retain their rights spiritually, culturally, and traditionally - Recommend developing a strategy to lower septic/seepage impacts on slope (e.g. low flow appliances, rain barrel to capture water for gardening, etc...). - Could have “Hot tips for Homeowners” brochure at City Hall that discusses water saving techniques. 	<ul style="list-style-type: none"> - The aesthetic qualities and scenic beauty of the Trinidad area are important community resources. -Recommend developing a cultural week to educate the public about the village and Tsurai/Yurok culture. - Natural resources are significant and should also be included in interpretation. - Recreational resources and uses of trails to access the 	<ul style="list-style-type: none"> - Concerned with saturation from the bluff side, particularly with septic is a concern because of quality of the water draining to a coastal resource - CC willing to participate in seeking resources to implement the TMP recommendations . - CC would like to see a vision come from the process and the TMP that considers all parties’ interests fairly and produces feasible and responsible recommendations 	<ul style="list-style-type: none"> - The primary goal of the Yurok Tribe is the appropriate protection, restoration, and preservation of the village site and cemetery. - Supports the transfer of the TSA to the Yurok Tribe. - The Yurok Tribe Culture Committee voted unanimously in support of the TAS goals for the future management of the site. -The Culture Committee voted

Management Issue	Tsurai Ancestral Society	City of Trinidad	Adjacent Property Owners	Interested Public	State Coastal Conservancy	Yurok Tribe
	<p>the City septic systems and runoff has saturated the bluff and created a swamp within the site. This is not how it used to be. It is a direct result of the seepage from failed septic systems.</p> <p>- Water quality issues impact the site and everyone who uses the beach since the contaminated water flows onto the beach where people recreate. It also flows directly into the bay, which is bad for the natural resources.</p>	<p>Plan.</p> <p>- City has concerns about the TMP becoming a political tool re: ownership.</p>		<p>beach for boating, kite flying, fishing, are important to residents and visitors.</p> <p>- Water quality issues, particularly failing septic systems, were identified over 8 years ago as critical problems, yet nothing was done.</p> <p>- The City knows there is a water quality problem. Hopes to develop a solution. Is currently conducting water quality testing (including water within the TSA)</p>	<p>for the protection of the site. Specifically, protection of access, cultural and natural resources, for future generations.</p> <p>- CC has funded the TMP and could possibly be a future funding source for implementing parts of the TMP. They could also support via recommendations funding proposals to other agencies.</p> <p>- The costs of implementation should not limit what is considered though they will definitely place limits on what</p>	<p>unanimously in favor of three resolutions regarding the TSA:</p> <p>1) Support the position of the TAS on these issues.</p> <p>2) Support the transfer of land to the Yurok Tribe.</p> <p>3) Establish a formal agreement between TAS and the Yurok Tribe for future management of the TSA.</p>

Management Issue	Tsurai Ancestral Society	City of Trinidad	Adjacent Property Owners	Interested Public	State Coastal Conservancy	Yurok Tribe
	<p>- Damage to the village site caused by seepage and failed septic needs to be seriously addressed and resolved by the City. The City has never accepted responsibility for the impacts of failing septic to the site, yet TAS has been asking the City to take action for years.</p> <p>- Bluff failure is a big concern. Causes need to be identified and action to prevent failure should be taken.</p> <p>-TAS has given priority to</p>			<p>and hopes this will help identify causes and solutions.</p> <p>-Consider a tri-government cooperative relationship: Tribe, City, and State to identify and resolve problems.</p> <p>- Many ideas presented will cost money to implement. Suggest finding funding sources to help make these things happen.</p> <p>- Tsurai village is a cultural resource that is valued not just by TAS or the Yurok Tribe but by the Trinidad</p>	<p>can be done. Ideas should not be disregarded outright simply because of cost.</p>
